Subject: Re: HE Davis Chicken Creek West

The site has been operated since 8/2000 but not by H.E. Davis Inc. we are still trying to finalize the permit with them, believe me it has been a struggle. Great Teamwork, Thanks so much for you help! Tom

Tom

I did finally contact Tony and he claims this site is permitted under a different company name (Geneva Rock). I told him we have no record of any previous approval orders from Air Quality for this site. Do you have any records of this site being permitted by DOGM in the past? It sounds like the pit has been used off and on for several years.

They will be receiving a violation for operating without a permit and for creating excessive dust from the haul truck loading area. They were making no attempt to minimize the fugitive dust from the hauling operation during my October 12 visit.

If Tony is able to show me an air quality permit for the site, the violation for operating without a permit would be dropped. I think this is highly unlikely since I am the only person in our office that has ever heard of the site!

I will send you an electronic copy of the violation once it has been finalized and mailed to the company.

Thanks for your help and have a great weekend!

Jay this does not surprise me. Tony's number is 801-802-6913. Does this warrant any sort of violation from your shop. We may consider one as a wake up call! Thanks so much jay you have been a great help.

Tom:

Did you ever meet with Mr. Christofferson from HE Davis? I have researched the site and it does not appear that this site has a permit from the Division of Air Quality to operate at this location. I did find a temporary permit issued to the company for this facility in December 1999. They would have been allowed to operate at this location for up to 1 year with a temporary permit.

I did pay a visit to the site last week. The crushing equipment was not operating. I did observe several haul trucks filling on site and it was pretty dusty!

Do you have a telephone number for Mr. Christofferson?

Thanks for your time and have a great day.
